Hi Seyram,

Yes I can confirm that is the case

Hi [REDACTED]

Thanks for confirming Can I confirm that this means that the journey times for the selected pairs would not change following the update in the modelling?

Regards,

Seyram

Seyram,

That is the latest version of the spreadsheet, and is consistent with the version sent to you by email on 23<sup>rd</sup> November with the additional analysis you requested

**Subject:** RE: WLO actions

Thanks [REDACTED],

All good now Is the WLO Journey Time Analysis spreadsheet updated following the runs? Or is this the previous version? Could you please provide an update to this if this the older version?

Many thanks

Seyram

Seyram

We've reuploaded the results to a new ftp location as below We've changed the folder names to just refer to the scenario number and provided a separate Scenario List file describing each scenario

[REDACTED]

Dear user,

You can access your FTP site from [REDACTED] with the following credentials:

username: [REDACTED]  
password: [REDACTED]

Data stored on your FTP site will be purged on 24/01/2019 10:39 After this date data will be unrecoverable

Regards,

Collaboration Applications Team

**Subject:** RE: WLO actions

Thanks [REDACTED]

I've had a go at extracting the files but unable to successfully unzip all files. I think this may be because some of the folder names are long plus possibly the extra "AM" folder making the file extension long. I've tried to extract to my desktop. I think this is an issue from scenario 22 onwards.

Could you please re-send these scenarios with shorter names? Or the full dataset if it's easier?

Many thanks

Seyram

Seyram

All model outputs can be accessed from the ftp site below

[REDACTED]

Dear user,

You can access your FTP site from [REDACTED] with the following credentials:

username: [REDACTED]  
password: [REDACTED]

Data stored on your FTP site will be purged on 23/01/2019 15:42. After this date data will be unrecoverable.

Seyram

Please find attached the technical note

Where would you like me to put the full set of model outputs for each scenario? On the Tfl server or via Motts ftp?

Thanks [REDACTED]

If the note won't be ready shortly, can you please share the benefit figures with us as previously?

I'm worried that time is getting tight so would be good to understand if the test with the convergence criteria has worked or not.

Thanks

Seyram
