[REDACTED]

I understand Andy has discussed timescales with you – I think we both agree that the timescales are frustrating and I can assure you that we are working to get this completed as quickly as we can.

In terms of the drawing, we are struggling to see the proposed kerb lines. Is it possible for you to resend a drawing with the proposed kerb lines highlighted – I realise that the kerb lines will be in a similar/the same position as existing.

Many thanks again,

Adam

Hi Adam,

Please find attached revised layout that includes an early start for cyclist. The addition of the early start is 4 second delay for the traffic phase on that approach. No other intergreens change. I don't really understand why its being proposed that it takes an additional 8 weeks for a TfL engineer to check a set of intergreens already checked by a TfL engineer. I appreciate a concept design may take 8 weeks which is the position we should be achieving in order to sign off the SIR.

What can be done to reduce the timeframe? At the moment we could be in a position that its going to take 12 weeks before we have intergreen timings to test the revised proposal.

I have attempted to call you both but it either rings out of goes to answer phone. Can we discuss this urgently tomorrow please. Im available all day

Regards

[REDACTED]

Please accept my sincere apologies for the delay – I can confirm that the Engineering Services Request has now been submitted.

We are currently implementing a revised system for processing schemes and there have been a few teething problems unfortunately. We apologise for the inconvenience caused.

In terms of timescales, we expect the request to be completed in the next two months.

I will discuss more detailed timescales with Andrew Rogers regarding the modelling.

Many thanks

Adam

Hi Adam,  
No problems, I thought I had upset you. I will be in touch later today. So we can get everything resolved.

Regards

[REDACTED]

Apologies for the delayed response – it has been a hectic couple of weeks catching up after a long break over Christmas and [REDACTED]

I have received initial timings from Engineering Services, however, the 8448 has not been audited/signed off and therefore the timings are not confirmed. This means that any work carried out would be subject to potential re-work later on, which I would definitely like to avoid. The Engineering Services Request has

been submitted through the proper channels, and once this has been issued, a signed off and approved 8448 will be provided to us.

In the meantime, I will discuss the 8448 with Rosemary, because it looks like the proposed design in the 8448 does not include Early Starts for cycles. Could you confirm the details of the Early Start that you require?

When I have discussed with Rosemary and got an idea of progress on the Engineering Services Request, I will get together a programme for you as soon as possible.

I hope you are well – apologies for the delays on this scheme, we are also frustrated by the delays as we are keen to progress this scheme as soon as possible.

Thank you for your patience.

Adam

**Importance:** High

Hi Adam,

Can you please provide clarification as to whether you have received the intergreen timings from Engineering. Based on your email dated 20<sup>th</sup> January you provided a response stating that you were still waiting for them to be sent from Engineering.

It would appear they were returned on the 13<sup>th</sup> January as per the attached email.

As this is the case can you please confirm a modelling programme as to when these results will be available

I look forward to hearing from you.

Regards

[REDACTED]

I chased this this morning.

Andrew Rogers is back in the office I will escalate when he gets back tomorrow.

Regards,

Adam

Hi Adam,  
Any update on this please. Do we have a date from Engineering as to when the intergreens will be done.

Subject: Royal Hospital Road Layout

Hi Adam,  
Please find attached feasibility layout for RHR 12/057. Can you please arrange for TfL Engineering to undertake intergreen checks. You already have the PO which was sent by Ian before Xmas. Once we get confirmation of the intergreens we can look to start the Vissim modelling. The only change they may be added prior to modelling would be the early start to cyclist on a north/south approach.

Hi Rosemary, Happy New Year, I have copied you on the email as you did the original intergreen checks.

Regards
