**Subject:** RE: 12/049

Hi Adam,

Just to confirm then I'll remove stages 4, 5, and 6. I think the rationale for stage 5 was in the event that FM Conway wanted to do some night works that involved split phasing the main road.

Thanks

[REDACTED]

Is it possible to remove the contingency stages. I think John Moffat has suggested that contingency stages would be problematic at temporary sites and in any case, I don't think we need the additional westbound only stages here.

Many thanks

Adam

Hi Adam,

Please see the design for 12/049, please could you review and advise on any changes.

Many Thanks

How are you – I hope you are well. Please accept apologies for the delay to the Chelsea Bridge Road quote – this is awaiting approval – I will chase this week.

I agree with the proposal to go with the proposed CLF timings for the final layout.

Many thanks

Adam

Hi Adam,  
Hope you had a good weekend. I have been asked to produce a temporary light layout for this site and wanted to know whether were able to use the proposed CLF you have produced for the final layout. I have

taken the existing CLF on the SQA8448 and added the temporary signals information. I have added an additional contingency stage to run the westbound only stage.

As the streams run under Leaving amber link there shouldn't be an issue with the plans. Obviously this is a last minute job so if you can get it back to us ASAP it would be appreciated were proposing to commission this site for Friday. They are just been checked internally so will be with you tomorrow morning. Give us a call if you want to discuss.

Regards
