Good morning gents,  
Just still morning,  
Anyway I would like to send you this SIR kindly completed by Adam. Would you be able to add your comments. I realise this is a big ask but any chance it could be done today. Only because I'm meeting Sachin tomorrow to discuss both job.

Its not imperative but it would be good to have.

Cheers and sorry for the short notice. I will try and call to plead my case

Regards

**Cc:** Rogers Andrew (ST)  
**Subject:** RE: Beaufort Street Fulham Road 12/18 and Beaufort Street - Kings Road 12/048 and Royal Hospital Road

[REDACTED]

As requested, we have re-run the modelling, thankfully the results do not change significantly.

I've updated the SIR with the full results – please could you update the document slightly to reflect that it now refers to both Beaufort Street junctions as a package.

When you are happy, please return to Andy Rogers and James Belloni to complete the rest of the SIR form.

I will be back in around three weeks.

Many thanks

Adam

**Importance:** High

Hi [REDACTED]

Beaufort Street junctions

Agreed with modelling approach, Adam have allocated some time to commence this next week and we have the updated results and SIR to you by 21<sup>st</sup> September.

I would recommend submitting the provisional TMAN as they can start reviewing any other relevant data, designs and discussion with any other stakeholders. The SIR can feed into this process later on in the discussion.

Royal Hospital Road

Happy for new designs to be submitted. We would need to charge for the additional modelling, do you need us to send you an updated PCAM to get agreement for cost?

Also Adam is away the 20<sup>th</sup> September until week commencing 7<sup>th</sup> October, we will be unable to pick up any modelling on this until after that date

Kind regards,

Andy

**Subject:** Beaufort Street Fulham Road 12/18 and Beaufort Street - Kings Road 12/048 and Royal Hospital Road

**Importance:** High

Hi Andy,

Just want to confirm our conversation yesterday.

Beaufort Street junctions

Its appreciated the original modelling didn't have intergreens checked for the Fulham Road / Beaufort Street junction. These timings have now been checked by TfL Engineering and there is a 2 seconds difference. TfL have agreed the best approach is to rerun the modelling (based on the original order) to ensure its robust and provide the results back to RBKC including the SIR no later than the 21<sup>st</sup> of September

Concurrently RBKC will submit the Provisional TMAN for TfL to access the scheme impact. Its appreciated the SIR may not be available at the point of submission but all the other information will be and the SIR can be added as an addendum once we receive it back from your team.

Royal Hospital Road

RBKC are undertaking a prelim design for this site. Once this is completed we will engage with TfL engineering to have the intergreen signed off. We will then ask TfL Network Performance to undertake additional modelling in order to understand the impact with and without additional cycling facilities.

Its not expected the modelling will be commissioned before early October.

Regards
