Not a problem.

Yes, spoke with [REDACTED] and clarified the issue with the CLF on 01/128

Thanks  
Adam

No problems Adam, Im just asking the question that's all. Lets speak with Andy when he is back.

Did you speak with [REDACTED] today?

Regards

[REDACTED]

I did not initially disagree with you on this, however, I was cautious and spoke to Joseph Bottoms and Andrew Rogers about this. After discussing with Andy, we concluded that the model would need to be re-run to reflect intergreen timings.

More than happy to discuss again with Andy when he is back though.

Thanks

Adam

Hi Adam,  
It looks like the intergreen difference is 2 seconds overall, from memory there seemed to be capacity within the model so it would be ashamed to have to rerun the model on such a minor change. Lets catch up when Andy ██████████ agree a way forward.

██████████  
Apologies, there have been a few issues with this.

Unfortunately, after completing the modelling, we received confirmed intergreen timings from Engineering Services for 12/018. These were not available at the time of the modelling because the incorrect drawing was submitted to Engineering Services so we did not have confirmed intergreens for this site – sadly the assumed timings were not quite correct. We will need to re-run the models with the revised intergreens before we can confirm the journey time results for 12/018 or 12/048.

I need to discuss with Andrew Rogers, but I don't think we have a budget for the additional modelling. I think we will need a further PCAM quote for the final modelling.

On a similar note, we will require additional budget to complete the Royal Hospital Road junction modelling because the time spent on this scheme has exceeded the time we budgeted for.

Happy to discuss this, but I will probably wait until Andrew Rogers returns so that we can confirm all of this.

I hope you find this information useful.

Kind regards,

Adam
