Details:

Hazards:

- Persistent Rain with a risk of some localised surface flooding

Treatment areas:

- No Action Required

No route type set.

Application rate: No Treatment Required

Min RST: Plus 1.9

No start time set.

Comment:

Rather cloudy today with outbreaks of rain pushing in from the south early this afternoon and turning heavy and persistent with a risk of some localised surface flooding and runoff. Rain continuing into this evening, but clearing eastwards into the early hours with clear spells developing towards dawn. RSTs above zero. Dry and bright tomorrow morning.
