

KEY	
①	Location reference number
	Proposed road marking - White
	Proposed road marking - Red
	Proposed bolt down temporary kerb (Black and White)
	Proposed Build-out - Asphalt infill
	Proposed traffic island
	Proposed relocated sign
	Proposed channel drain, invert depth 71mm, overall depth 105mm.
	Proposed channel drain, invert depth 121mm, overall depth 155mm.
	Proposed drainage pipe connection
	Proposed chute gully
	Proposed Cycle logo to TSRGD diagram 1057
	Proposed "Keep Right" self-righting sign bollard
	Existing "Keep Right" self-righting sign bollard
	Existing temporary build-out
	Existing grating channel drain or existing 50mm pipe drain
	Existing sign
	Existing gully
	Existing gully grating and frame to be raised to new build out level
	Existing utility cover to be raised to build out level
	Existing ramp to be removed
	Existing blue temporary barrier to be removed
	Existing red & white water filled barrier to be removed
	Road markings to be removed
	Asphalt infill and bolt down temporary kerb to be removed

NOTES

- Drawing based on number of sources
 - Monument junction topographical survey from 2019
 - Monument to Wormwood Street - topographical survey from 2014
 - Cornhill / Leadenhall St junction - As Built drawings from 2019
 - Wormwood Street to Worship Street - topographical survey from 2016
 - Great Eastern Street / Commercial street junction - Ordnance Survey base
- The drawings may not be up-to-date and some elements of the street furniture may not be shown on the survey. Some manual amendments may also have been made to tie-in various CAD drawings.
- LAYOUTS ARE INDICATIVE ONLY
- Ongoing construction work may have resulted in changed kerbs / footways / street furniture. On site checks required to confirm current layouts.
- Temporary traffic management design to be undertaken by a competent contractor in line with relevant Code of Practice.
- Design subject to change following monitoring.
- No signage or wayfinding has been included - to be developed by TTM designer as required.
- Materials used to demarcate pedestrian areas to be confirmed by the contractor.
- Street furniture relocations to be confirmed with Asset Operation.
- Where temporary kerbs tie into existing kerbs detailed design / implementation should ensure no trip hazards are introduced
- Existing temporary build-outs have not been surveyed. The build-out layouts in this plan are indicative only and are based on the contractor's detailed design from 2020.
- To be read in conjunction with drawings 3877002-TFL-PRD-00-DR-TE-02.
- Proposed drain channels to be installed between 5mm and 10mm below pavement/existing kerb level. Scraping part of existing wearing course required.
