**Subject:** RCP - Highway TAA - A3 136 Roehampton Vale (645) - Site Redesign

Hi,

Back in Feb/March 2018 the design for a rapid charging point site 645 on Roehampton Vale was approved and duly constructed. The site has been in operation for 6 to 9 months, however following public grievances about the site the decision has been taken to re-design the site. I have attached the previous approval email for site 645 for reference.

Please could someone complete a Highways Technical Approval for the redesigned Rapid Charging Point due to be installed on Roehampton Vale (645) – the new design will see the RCP placed on a build out and public EV bays placed either side of the charge point.

This site is, and will continue to be, a Chargemaster site.

Please let me know if you require any further information.

Kind regards,

**Matthew Chandler**
