Subject: Rapid Charging - Site 645 - 136 ROEHAMPTON VALE (A3 TLRN)

Hi David,

As discussed, please see attached the proposed redesign for [Site 645](#). Since installing this site it has been brought to our attention that this is a shared cycle and pedestrian footpath. The re-design re-establishes the footpath to adequate clearance but in order to allow all electric vehicles to make use of the charge point two parking bays would be required.

Would you be able to share you thoughts on this proposal?

Many Thanks,

Matthew.

Matthew Lewis
