Hi Andy

Thanks for the suggestions. I am sure [REDACTED] who is copied in with follow this up next week, particularly your suggestions for some surveys (resourcing may be tricky...)

Always good to know we have a knowledgeable local resident on the case! and yes it would be great to work collaboratively with you on this one. We acknowledge there may not be easy answers and trade-offs, as ever!

Hi again [REDACTED]

Before we respond in more detail next week and being mindful of the timescales you've got, I think it would be useful to get a bit more information if we can. I think that will help us make the best decision here as the intentions around what you're trying to achieve are completely in line with our own objectives.

[REDACTED] is a local resident, [REDACTED] [REDACTED] and so the knowledge of what happens with traffic in this area is excellent. Would it be possible to do a few traffic

surveys next week please – at Fullers Way North, at Hook Rise North / Cranborne Av and the slip road to Tolworth. Could you also survey the recreation ground car park [REDACTED] is that right?) where it does seem that there is a lot of school drop off traffic. We wondered also, if it is worth surveying the area to the south of the pedestrian underpass to see if that would be where school trips displaced to...and if that might be better / a success of the experiment?

Sam – could you ask one of your team to dig out the collision stats for this stretch of the A3 please. We know there is a queue already in the peaks down the slip road, to make a decision on this, we'd need to understand if additional traffic on the slip road could be a safety issue and would want monitoring of such collisions to be part of any monitoring strategy, if agreed.

Could I also ask for some information on what you would be measuring as part of the experiment, how will you know if it has been a success and what would constitute the opposite? Just looking on Google Maps, the Hook Rise North / Cranborne route is an obvious diversion, would you consider closing that off as well as part of the experiment or would an increase in traffic there be an acceptable outcome?

Hopefully this helps us respond this this constructively.

Andy

Hi Andy

that would be great, thanks.

I think we need report for neighbourhood committee drafted by (approx) 7 july so that ties in well.

Kind regards

Hi [REDACTED]

Thank you for the letter.

I'll discuss this with Jenny, who looks after Kingston in my team and we'll see what options we've got available to us for this. If I aim to get back to you by the end of next week will that be ok?

Andy
