Subject: RE: resistograph: Farringdon Road at Mount Pleasant, opp post office

As requested please report following my recent investigation of this tree.

If you could please confirm what action will be taken with JP that would be appreciated.

Thanks

Grayham

kindest regards

Hiya, information below. Thanks! Basically if you could take a quick look at the tree and say what you think then that would be appreciated, personally I have been saying for years that it should come down if they can't move the traffic away from the tree on that left hand turn.

Rob – Grayham has kindly volunteered to inspect..

Cheers, John

I think someone will need to go up and inspect but I'm not about for the next ten days or so.. If I can get there tomorrow then I will. Otherwise I could ask Grayham or Robin..

I was a bit confused myself. I'm only worried about the Farringdon one. Presuming we aren't continuing with Resistograph. What's the next step if not?
