- 43.1 No waiver of any of the provisions of the Contract is effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with the provisions of Clause 45. The single or partial exercise of any right, power or remedy under the Contract shall not in any circumstances preclude any other or further exercise of it or the exercise of any other such right, power or remedy.

44 ILLEGALITY AND SEVERABILITY

- 44.1 If any provision of the Contract (in whole or in part) is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision shall be severed from the Contract and the remaining provisions shall continue in full force and effect as if the Contract had been executed without the invalid, illegal, or unenforceable provision. In the event that in the Authority's reasonable opinion such a provision is so fundamental as to prevent the accomplishment of the purpose of the Contract, the Authority and the Service Provider shall immediately commence good faith negotiations to remedy such invalidity.

45 NOTICES

46.1.2 without prejudice to the Service Provider's obligations under the Contract, the Service Provider is responsible for and shall make no claim against the Authority in respect of any misunderstanding affecting the basis of the Service Provider's tender in respect of the Contract or any incorrect or incomplete information howsoever obtained.

46.2 Nothing in this Clause 46 excludes any liability which one Party would otherwise have in respect of any statement it has made fraudulently to the other Party.

47 COUNTERPARTS

47.1 This Contract may be executed in any number of counterparts or duplicates, each of which shall be an original, and such counterparts or duplicates shall together constitute one and the same agreement.

48 RELATIONSHIP OF THE PARTIES

48.1 Nothing in the Contract constitutes, or shall be deemed to constitute, a partnership between the Parties. Except as expressly provided in the Contract, neither Party shall be deemed to be the agent of the other, nor shall either Party hold itself out as the agent of the other.

49 FURTHER ASSURANCE

49.1 The Service Provider shall provide Assurance to the Authority in accordance with the requirements of Schedule 14 (Assurance) in order to provide clarity and visibility to the Authority in relation to the Service Providers compliance with its obligations under this Contract.

49.2 Each Party will do or procure the doing of all acts and things and execute or procure the execution of all such documents as the other Party reasonably considers necessary to give full effect to the provisions of the Contract.

50 AUTHORITY EVENTS

50.1 The Service Provider will ~~immediately~~ give notice to the Authority as soon as reasonably practicable, but in all cases within two (2) Business Days if the Service Provider becomes aware that an Authority Event has arisen or is likely to arise. That notice must include:

50.1.1 details of that Authority Event (including the date of occurrence or likely occurrence);

50.1.3 a calculation of the increased costs (if any) that the Service Provider is likely to incur as a direct result of that Authority Event in completing Transition or performing the Services (as the case may be),

in each case in sufficient detail to enable the Authority to reasonably understand, consider and assess the same and the likely impact on the Service Provider's obligations under this Contract.

50.2 The Service Provider will promptly supply to the Authority such further information relating to any Authority Event and the rights claimed by the Service Provider under this Clause 50 as the Authority may reasonably request from time to time.

50.3 If the Service Provider does not provide any information required to be provided under Clauses 50.1 or 50.2 on the date when it should be provided then the Service Provider's rights to be relieved from performance of its obligations and/or to be reimbursed for additional costs incurred by it pursuant to this Clause 50 will not apply to the extent relief would not have been required or costs incurred had the information been provided within the required timescale.

50.4.1 results in a delay to any Transition Milestone being achieved, or to the Service Commencement Date or to the completion of Transition beyond the SCD Long Stop Date or the Transition Long Stop Date (as the case may be), the relevant Transition Milestone Date, and/or the SCD Long Stop Date and/or the Transition Long Stop Date (as the case may be) will be postponed to such future date as is reasonable given the nature and extent of the relevant Authority Event;

50.4.2 following the Service Commencement Date, affects performance of, or results in a delay to, performance of the Services (or part of them) then the Service Provider's obligation to perform the affected Services (including its obligation to meet Service Levels (and reduce the Charges by way of crediting Service Credits (where appropriate)) will be deemed to be amended, or delayed (as appropriate), to the extent reasonable to reflect the relevant Authority Event provided that nothing in this Clause 50.4.2 will extend the Term; or

50.4.3 causes the Service Provider to incur additional costs, the Service Provider will (subject to Clause 50.5.3) be able to recover such reasonable additional costs from the Authority that directly flow from the relevant Authority Event in accordance with the principles set out in Clause 50.6.

50.5.3 in respect of the ability to recover additional costs pursuant to Clause 50.4.3, the additional costs which the Service Provider would be entitled to recover in respect of the relevant Authority Event exceed £~~5002000~~ ("the Threshold") provided that:-

50.5.3.2 if the Threshold is exceeded for any individual act, omission, incident or circumstance which constitutes an Authority Event, the Service Provider shall be entitled to recover the whole amount and not just the excess.

50.11 The Service Provider will have no rights pursuant to Clause 50.4 unless and until the extent of the Service Provider's entitlement to relief from performance of, or right to delay performance of the Services or complete Transition (as appropriate) has been agreed by the Parties in writing. If the Parties cannot agree upon whether or not a Authority Event has arisen and/or the extent or consequences of a Authority Event or the extent of any relief due to the Service Provider under Clause 50.4 the matters in dispute will be referred to the Dispute Resolution Procedure.

50.12 The Service Provider's sole remedies in respect of any Authority Event will be as set out in this Clause 50. The Service Provider will have no right to terminate this Contract pursuant to Clause 34 (Breach and Termination of Contract) (or otherwise) in respect of any Authority Event.

2 SCHEDULE 2 – OVERVIEW OF THE CONTRACT

1. Introduction

1.1. Scope and Purpose

- 1.1.1. This Schedule provides an introduction to and an overview of the Contract documentation and the concepts behind both its structure and the approach and language adopted within the Contract and the Schedules.
- 1.1.2. This overview is intended to introduce and expand on the information provided elsewhere within the Contract to ensure that the concepts and approach underlying the main provisions are easily and properly understood. It is not intended to contain specific obligations on either Party.
- 1.1.3. The overviews within this Schedule are intended to provide a high level picture only and should not be interpreted as being complete or comprehensive. In the event of any inconsistency or conflict between the contents of this Schedule and any other part of the Contract, that other part of the Contract shall take precedence.

1.2. Service Continuity

- 1.2.1. The Authority has developed a reputation for delivering a high quality, reliable and consistent service to its customers through the portfolio of contracts and systems managed by its Customer Experience Directorate. It is essential that this continues and this overview seeks to explain how the Service Provider will operate as part of this portfolio to deliver excellent and potentially more integrated services.
- 1.2.2. Specific requirements covering transition from the Authority's Existing Service Providers, Required Variations (whereby the Authority can instruct Variations to proceed, with the cost and other impacts to be determined afterwards), enhanced co-operation obligations, Service management and flexible handback obligations (including the potential for the Authority to instruct phased handback and/or handback continuing over a period beyond the initial or extended contractual period) have been included to re-enforce and support the need for service continuity.

1.3. Assurance

- 1.3.1. The Authority has engaged the Service Provider on the basis of the Service Provider's experience, expertise and proposed solution to the delivery of the Services and other obligations under the Contract. The Authority wishes to give the Service Provider latitude to manage its operations effectively; however, the operation of the Services is critical to the Authority's business operations and consequently the Service Provider needs to demonstrate to the Authority that it is complying with the principles and specific requirements and obligations set out in the Contract. This process is called Assurance and is principally set out in Schedule 14 (Assurance).
- 1.3.2. Assurance is an activity performed by the Service Provider to demonstrate compliance to the Authority and includes, but is not limited to, the submission of documents, responding to questions and comments, and

witness testing. Assurance is frequently an incremental process that provides confidence to both parties of successful delivery. It should not, however, be confused with approval from the Authority and does not relieve the Service Provider of its responsibilities or liability under the Contract.

2. Document Architecture

The Contract is constructed from three mutually supporting elements:

Main Terms & Conditions – this contains the main rights and obligations of the Parties expressed in Clauses;

Schedules – these contain further obligations, the Service Scope Specification, Service Levels and contract processes expressed in paragraphs; and

Supporting Documents – these are documents (if any) which are incorporated into the Contract by reference.

3. Not used

4. The Services

4.1. The services to be delivered by the Service Provider are set out in Clause 4 (The Services) and further defined along with the Service Levels in Schedule 8 (Service Management).

4.2. Specific requirements on service management, service design, service transition, service operations, incident management and change management are described in Schedule 3 (Transition) and Schedule 8 (Service Management).

APPENDIX 1 - Service Dependencies and materials

3. Oyster Professional User System (OPUS)
4. Oyster Card Transaction Analyser (OCTAGone)

1. System Applications and Products Customer Relationship Management (SAP CRM)

Overview

SAP CRM is used to manage and record all Customer interactions. Each Contact can be recorded as either an Interaction Record, or a Business Partner can be set up if this does not already exist and the contact recorded via a service ticket for the Business Partner. The service tickets numbers generated via SAP CRM are also used in various other systems such as OPUS as a reference against any information stored. service tickets can be created via various means of contact, telephone; email; web form; fax and letter. These are all viewable within SAP CRM and attached to the relevant service tickets.

Business Partners contain the Customers Full Name; Address; Telephone Number; Email Address and Oyster card if applicable. They also contain any documentation or emails sent in via the Customer. If this information has any financial information such as a (Primary Account Number)/PAN Number this is redacted before the document is scanned in and attached to the service ticket. If any email contains financial information such as a PAN Number the email is deleted and not attached to the service ticket. If any service tickets are found to contain any financial information, they can be marked as sensitive which prevents any agents from viewing that service ticket.

The SAP systems are hosted by our SAP Basis (Technical) partner HCL-Axon and are physically in a DC in Northern Ireland – they are not in TfL DCs.

SAP CRM is not accessed via a URL, but by the SAPGUI application, which is deployed on all desktops. The SAPGUI is SAP's proprietary interface. When the GUI is configured, the information it requires is the instance number of the SAP application (02 in this case) and the IP address or DNS entry for the application server. The SAPGUI then connects on the app server to an application called the Message server (which in the case of SAP CRM listens on port 3602) and this allows for the connection between the desktop and the SAP application server instance. The IP of the server on which the Message Server runs is 10.242.66.227.

Application Access Steps:

1. Go to Start->All Programs->SAP Front End 7.30->SAP Portal
2. Select Customer Service -> CRM from SAP Portal to log into SAP CRM

2. Business Object

is a reporting tool used to produce reports on all Oyster card transactions, these include financial transactions; journey history; product history and registration details on the Oyster card.

It is used to validate both cash and card transactions. It shows data only for machines/stations owned by London Underground. Only less than 8 weeks of data is visible. Older data is saved in the underlying database but is not visible to the users.

Data Held

Business Objects itself is only a reporting tool that is used to access the databases holding Oyster card information, such as registration; sales and journey history.

Access

Access is managed via the Authority who will need to install Business Objects Continuum on to the user profile and create the user profile and allocate a password.

3. Graphical User Interface (GUI)

Overview

Graphical User Interface (GUI) is used to interrogate the Oyster card Management System, which holds data relating to Travel Products held on Oyster cards and recent journeys made by the cardholder. For example, an agent can use GUI to

access details of an Oyster card and its possible owner. It can also be used to view a Customer's touch in/out journey history.

GUI accesses data stored on the Central System (CS) primary database to display following information.

- Cardholder Details
- Card Details
- Recent Pre Pay Transactions.
- Hotlist Details
- Cardholder Search

GUI shows details of all cards (unregistered, register-online, registered-using form). Information from GUI is copied and pasted into SAP CRM. The agents can also overwrite CS data via the GUI. This is used by Oyster and London Underground Customer Services.

The database contains the following Customer details. Full Name; Address; Phone Number; Email Address; Security Answer; Travel Products; Discounts Applied; Pay as you go value and Journey History.

Application Access Steps:

1. Go to Start->All Programs->NSLD Prestige 5.3 -> NSLD Prestige
2. Enter login credentials to login

4. Oyster Extension on National Rail (OXNR)

Overview

OXNR knowledge base provides single source for looking up fares involving National Rail and TfL services. It is used to calculate journey cost.

OXNR provides a rich set of functionality including:

- Given a from/to location provides charge
- Given zones provide ticket costs for weekly, monthly etc.
- Station - address, map, pictures of key locations such as gate lines, POMS and TOM'S.

It is an html page hosted on a server which then includes other web sites as portlets on the main page. It accesses following external websites:

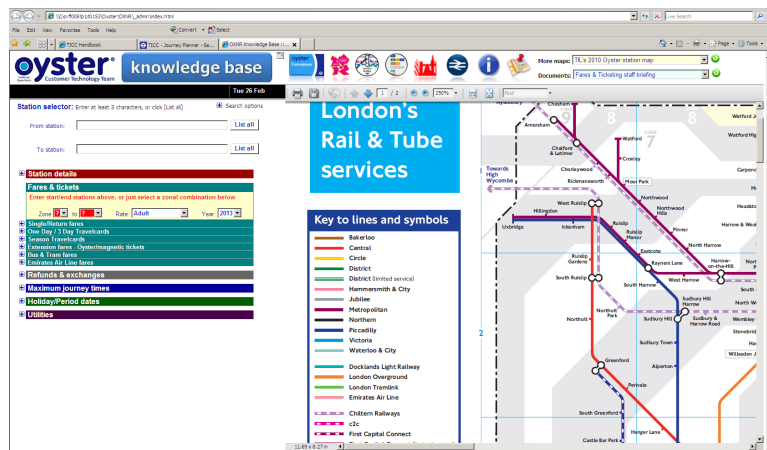

- OCC Fareviewer (<http://pdc2mcs003/FareViewer/>)
- TICC Journey Planner (http://journeyplanner.tfl.gov.uk/ticc/XSLT_TRIP_REQUEST2?language=en)
- TfL Oyster network map (<http://www.tfl.gov.uk/assets/downloads/oyster-rail-services-map.pdf>)
- National Rail Enquiries (<http://www.nationalrail.co.uk/>)
- Google Maps (<http://maps.google.co.uk/>)

It also has a series of static links to the Train Operating Companies (TOC) websites and certain other pages of interest:

Application Access Steps:

- 1.) Enter \\Cisvfl008\b1it0153\Oyster\OXNR_admin\index.html in internet explorer.

5. Oyster Professional User System (OPUS)

Overview

OPUS is the Authority owned web based application used by to process non Contactless Payment Card (CPC) refunds to the Customer. Refunds can be processed in several ways. Web Account Credit; BACS; Payment Card; or as an Ad-Hoc Load direct to the Customers Oyster card. OPUS is also used to approve refunds generated by agents.

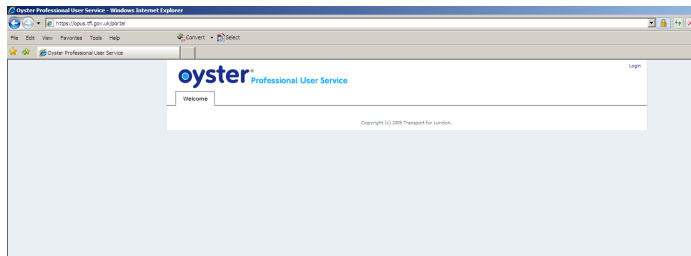

The OPUS website is also directly linked to the Oyster Online website on the TfL website.

Agents can access Customers online accounts as well as create online accounts for the Customer in order to process a refund. Refunds can also be processed directly to an Oyster card without the need for an online account; however this can only be done as an ad-hoc load. Agents can also replace any lost or stolen Oyster cards via OPUS. The OPUS contains access to the Oyster card Central System (CS), which holds data relating to tickets and products held on Oyster cards. It also accesses the off card details stored against the Oyster card such as Full Name; Address; Phone Number; Email Address; Security Answer; Travel Products; Discounts Applied; Pay As You Go (PAYG) value; Journey History and all online transactions including refunds.

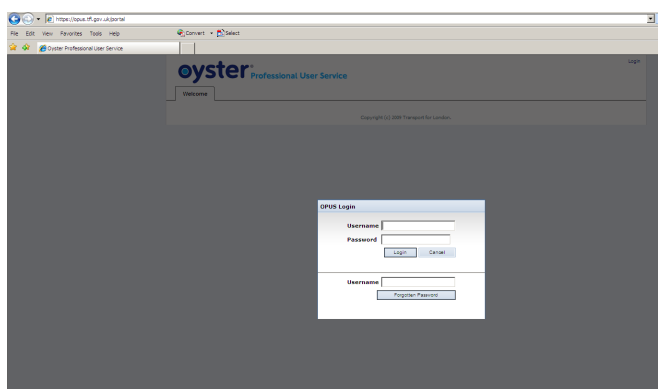

Agent can edit all the personal information or hotlist a Customer Oyster card via OPUS or make transactions on behalf of a Customer.

Application Access Steps:

1. Enter <https://opus.tfl.gov.uk/portal> in internet explorer and press login button on top right.

2. Enter login credentials to login

6. OCTAGone

Overview

OCTAGone is a web based application used to interrogate the Oyster Card Management System (CMS), which holds data relating to ticket products held on Oyster cards and recent journeys made by the Customer. For example an agent can use OCTAGone to assess a Customer's touch in/out journey history to resolve an entry / exit refund case. It also holds Oyster card owner details if the Oyster card has been registered.

The database contains the all transaction and journey history on a 56 day rolling basis. This shows all purchases of either Travel Products or Pay As You Go(PAYG) credit. It also shows all touches of the Oyster card on Oyster readers on the TfL network.

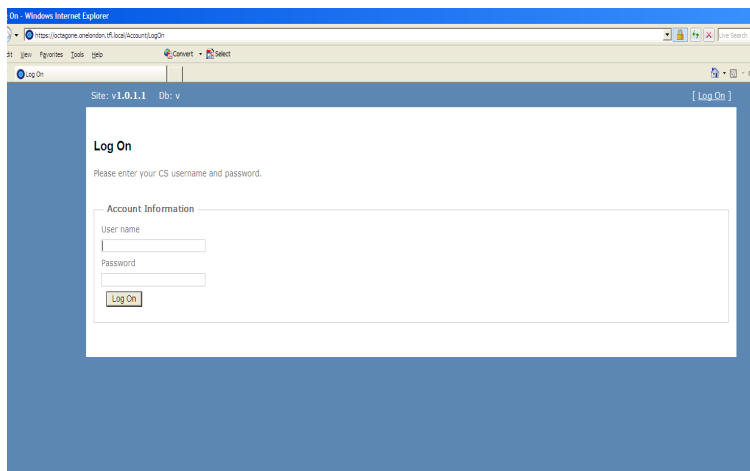

Agents have the ability to view the information held however they cannot edit any information displayed.

7. Customer Account System (CAS)

Overview

CAS is the TfL owned web based application used by CCO to process Contactless Payment Card (CPC) refunds to the Customer. Refunds are processed directly to the CPC bank account. CAS is also used to approve refunds generated by Agents.

The CAS website is also directly linked to the Customer facing contactless area of the Authority's website called Customer Account Self Care (CASC).

CAS adds synthetic touches to Customer's journeys. With this in mind gestures of goodwill or refunds of any other nature can be voided within CAS and then re-processed via OPUS.

Refunds can be processed directly to a CPC without the need for an online account. CAS accesses the off card details stored against the CPC such as Full Name; Address; Phone Number; Email Address; Password; Security Passcode; Journey History and Payment History. User can also edit all personal information.

Application Access Steps:

1. Enter <http://contactlessportal.onelondon.tfl.local/> in internet explorer and enter log in credentials.

The screenshot shows a web browser window with the URL 'http://contactlessportal.onelondon.tfl.local/'. The page title is 'Transport for London Customer Account System'. There are three tabs: 'Find Customer', 'Manage CAS Users', and 'Create CAS User'. Below the tabs is a 'Customer Account System Logon' section. It contains an 'Email' input field, a 'Password' input field, and a 'Sign In' button. Below the login fields is a small disclaimer: 'This system provides access to TfL customer data. You are only permitted to use it for legitimate business purposes directly related to the performance of your duties and in accordance with your terms and conditions of employment. The TfL Code of Conduct, TfL's Privacy and Data Protection Policy, relevant HR policies covering discipline of work and the use of IT systems. If you misuse your access to the system or any of the associated data, you may be committing gross misconduct and a criminal offence under the Data Protection Act 1998 and/or the Computer Misuse Act 1990. Please note that your use of the system will be recorded and monitored for audit and compliance purposes. By continuing, you are acknowledging that you have read and understood this statement.' At the bottom of the page, there is a footer with links: 'HOME OF LONDON', 'Freedom of information', 'Jobs', 'Media', 'Terms and conditions', and '© Transport for London'.

8. Avaya Interaction Centre (AIC)

Overview

AIC is Avaya software that the Authority use as their telephony platform. AIC provides access to phone functions from a computer desktop. This therefore enables agents to make and receive calls from a desktop.

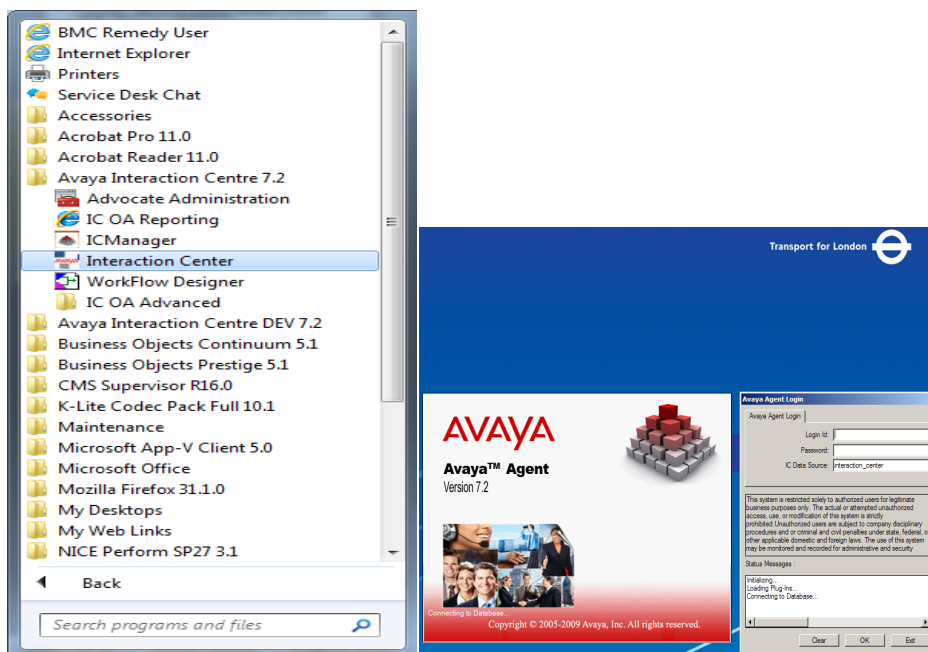

The AIC toolbar specifically provides the ability for agents to transfer calls (cold and warm), call internal and external numbers and for agents to place a Customer at a certain point in the Interactive Voice Response (IVR) call flow. The Toolbar monitors the agent's status and allows them to define why they are unable to take a call, selecting from a number of reasons. This information is then able to be retrospectively analysed in order to monitor productivity. Additionally the toolbar also allows a user to access a central contact list of useful contact numbers and display data associated with the call.

The Authority's IVR has the functionality to work with AIC to carry out primary identification and verification (ID & V) for Contactless Payment Card (CPC) Customers. Registered CPC Customers can therefore self-serve by using their PAN number, expiry date and pass code. This enables the Authority to be able to operate

in a PCI compliant manner and also means that when the call is answered the agent and Customer do not have to go through the ID & V process.

Application Access Steps:

- 1.) Go to Start->All Programs->Agent Toolbar 7.2 -> Interaction Center
- 2.) Enter log in credentials
- 3.) The second screen will self populate, just click OK
- 4.) The user will then need to enter their extension number

9. IC OA Reporting

Overview

IC OA Reporting is the web passed application that allows the agent to monitor live queues. You can see live queue durations and the amount of callers queuing real time in both a numerical and graphical format.

OA Basic also has the functionality of monitoring call agent status' to assist in understanding capacity and availability.

Application Access Steps:

1. Go to Start->All Programs->Agent Toolbar 7.2 -> IC OA Reporting
2. Enter OneLondon log in credentials.

10. Eckoh Protect

Overview

Eckoh protect is the web based application used remain PCI compliant. Eckoh protect also helps ensure that ID&V is completed. If a Customer did enter their PAN incorrectly/unsuccessfully while they were in the IVR an agent can use Eckoh protect to carry out ID&V and continue the call rather than putting the Customer back in the IVR queue.

Application Access Steps:

- 1.) Enter <https://tfl-ftp.eckohprotect.com/> in internet explorer.

11. SharePoint

Overview

SharePoint is the Authority owned web based application that is used to share information and knowledge. The section of SharePoint that is used primarily by agents is the knowledge base. The knowledge base is regularly updated with process changes, upcoming events and pertinent ticketing bulletins. This is maintained by Authority's knowledge team.

Application Access Steps:

- 1.) Enter <http://onelink.tfl.gov.uk/sites/custex/ccokb/Pages/KnowledgeBase.aspx> in internet explorer.

12. Avaya One-X Agent

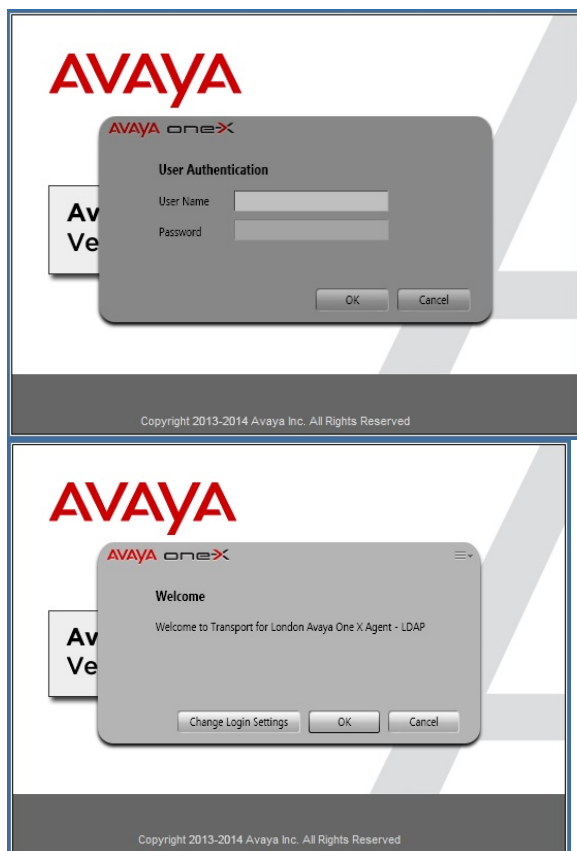

Overview

TfL uses Avaya One-X Agent to associate a Station ID (TfL extension number) with a DDI number at the Service Provider's office (for each individual agent). Avaya One-X Agent is therefore software equivalent of a TfL desk phone. One-X Agent makes the agent's Station ID active and associates it with the allocated DDI number for that Station ID. From here the agent can then log in to AIC Toolbar. This associates the

agent with their allocated agent ID and lets the system know that the agent is ready to receive calls.

Application Access Steps:

- 1.) Launch One-X Agent from Storefront
- 2.) Enter log in credentials
- 3.) Select OK

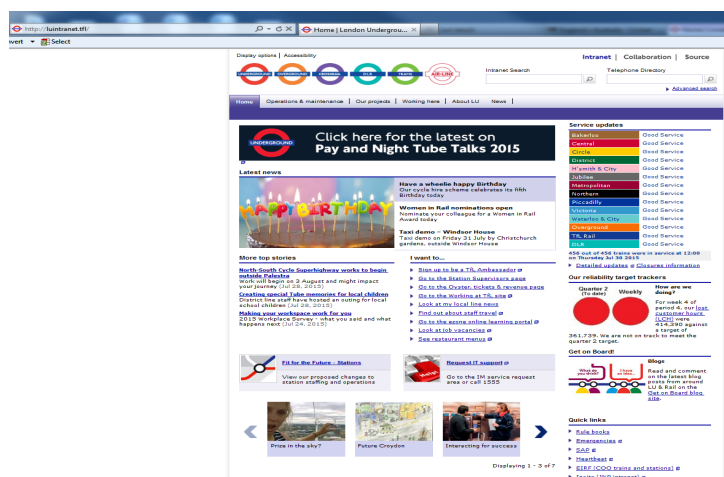

Heartbeat

Overview

Heartbeat is a web based application used to identify historic tube line performance and from this information agents can decide if the Customer are due refunds for any claimed delayed journey. Heartbeat is maintained by London Underground Control Centre (LUCC). Heartbeat is located on the Authority's SharePoint site. Heartbeat provides detailed live status updates, planned closure information and historic performance.

Application Access Steps:

1. Enter <http://luintranet.tfl/> in internet explorer.
2. Select "Detailed updates" on the right hand side of the screen below the service updates.

14. Cognos

Overview

Cognos is the application that allows the agent to retrospectively run reports on AIC data. Cognos is the reporting tool that reports historically specifically on AIC data. Reports are manually set up and saved and then can be ran and exported to an excel or PDF document. Reports can be run over different date ranges an also at an interval basis (half hourly). Reportable fields include but are not exclusive to basic demand (Offered, answered, abandoned) and also individual agent specific stats (average talk time, shrinkage, lateness).

Application Access Steps:

- 1.) Go to Start->All Programs->Agent Toolbar 7.2 -> IC OA Reporting

Closing & Sign Off	<p>The closing statement must be semi-formal. Categories	Definition	Good examples	Bad examples
SubjectLine	The subject line should refer to the topic clearly. It must not include 'TfL', reference numbers, initials or employee numbers.	<i>Lost Property – Bus Route 24</i> <i>Station name, bus route number, name of place – 'Visit to London Zoo'</i>	<i>TfL: (ST: 4897563) bus query</i> <i>RE:</i> <i>FW:</i>
Salutation & Opening Statement	The opening statement should engage with the customer and reflect the seriousness of the issue. The customer should be addressed correctly – (if name unknown; Dear Sirs or Dear Sir / Madam).	<i>Thank you for your email of 5 May about the problems you experienced on the Central line.</i> <i>Thanks for your further email of 8 May about your Oyster refund.</i> <i>Dear Ms Jones</i>	<i>Thanks for contacting us...</i> <i>In response to your further email...</i> <i>Thank you for contacting the Oyster Helpline.</i> <i>Dear Barbara Jones</i>
Empathy	The response should demonstrate an understanding of the thoughts, feelings, and emotions of the customer.	<i>I'm sorry you were delayed on the District line and understand this must have been frustrating for you.</i>	<i>I am sorry to learn of the delay you experienced...</i> <i>I apologise for any inconvenience caused</i>
Writing Style & Tone	This should be semi-formal. The response should be written in Plain English and must include simple words and contractions. A contraction is a shortened version of two words.	<i>Simple words: about, tell, check, do</i> <i>Contractions: I've, there's, won't, I'm</i>	<i>Complex words: advise, verify, action, regarding</i> <i>Expansions: I have, there is, will not, I am</i>
Positive Words & Expressions	Encouraging words should be used. This helps to indicate what has been done / can be done for the customer in a positive manner. Imitators must be avoided. Positive language softens the tone before giving bad news.	<i>Positive words: happy, delighted, my pleasure, good, excellent, fortunately, definitely, of course, great</i>	<i>Negative words: unfortunately, unable, failure, refuse, damage, error</i> <i>Imitators: Gesture of goodwill, goodwill gesture, please note, as mentioned previously, I've said before, you must</i>
Structure	A structured response should address all points raised in a reasonable order. This shows the customer that their query has been understood. It should have a clear beginning, middle and end and information should be logically grouped together.	<i>Beginning: engages with the customer query</i> <i>Middle: forms the body of the response</i> <i>End: summarises the provided resolution</i>	<i>No clear and logical flow: Information is not grouped together</i>

APPENDIX 6 - interface specification

1. Document Purpose

- 1.1. This document provides the high level design requirements for a Service Provider to be able to interface with the Authority's contact centre.

2. Introduction

- 2.1. The scope of the Authority's contact centre operations is expanding with the introduction of Contactless Payment Card (CPC) requiring the establishment of the best possible technology platform solution stretching across multiple contact centre sites, residing on and off of the Authority's technical estate.
- 2.2. As a part of the expansion, the Authority has identified options to package its telephone stack and desktop applications. For a given Service Provider call centre, this will enable the Authority to share its applications so that the Authority can start handling calls and provide support to customers by accessing same application suite as used by the Authority's agents.
- 2.3. The following sections provide the specific technical requirements that a Service Provider must satisfy in order to be compliant with the Authority's contact centre.

3. Technical Interface Requirements

- 3.1. The Authority uses Avaya One-X Agent to associate a Station ID (Authority extension number) with a Direct Dial Inwards (DDI) number at the Service Provider's office (for each individual agent).
- 3.2. The following diagram and notes provide the background to this technical requirement:

The following paragraphs describe the management of the various scenarios of call types depicted in the above diagram:

1. The Service Provider's agent logs in to One-X Agent. This makes their Station ID active and associates it with the allocated DDI number for that Station ID. Next the Agent logs in to Avaya Interactive Centre (AIC) toolbar. This associates the Agent with their allocated Agent ID and lets the system know that the agent is ready to receive calls.

2. A customer calling the contact centre is initially presented with a series of options managed by the Interactive Voice Response (IVR) system. If the call requires assistance from a Service Provider's agent, the call is presented to a queue in the Authority communications systems.
3. The communications system determines the skills required to handle the call and selects the next available Agent (by Agent ID).
4. The call is then routed through the Authority communications systems to the Station ID for that Agent.
5. The Authority communications system translates the Station ID into the DDI number for the Agent and routes the call to that number over the Public Switched Telephone Network (PSTN). At the same time the Agent receives an alert on the AIC toolbar indicating a call is coming in.
6. The agent answers the call and is connected to the customer.

3.3. The technical requirements that must be satisfied to enable this connectivity to be implemented are relatively simple. The following subsections detail the individual pre-requisites for connecting with the Authority systems. Standard policy documents have been embedded where applicable. These must be read and considered a part of this technical requirement.

4. Software Requirements

- 4.1. Up to date, supported version of the Citrix Receiver software, as listed on the Citrix Receiver Lifecycle Milestones website:
<http://www.citrix.com/support/product-lifecycle/milestones/receiver.html>
- 4.2. Up to date, supported version of a web browser, as listed in the "Browser Standard" document referenced. Please indicate the name and version you plan on using.

[For the purposes of ITB please see Vol 1 Appendix 12 Browser and Device Support]

5. Hardware Requirements

Each active Agent will require the following:

- 5.1. Computer with network access, capable of running the software listed in subsection 3.1 – Software Requirements
- 5.2. Telephone with a unique Direct Dial Inwards (DDI) number.

6. Interfaces

- 6.1. The Service Provider must agree to the terms covered in the Authority Code of Connection Policy document, and indicate how you will comply with each requirement specified:

[For the purposes of ITB please see Vol 1 Appendix 13 Code of Connection Policy]

- | 6.2. The ~~Virtual Private Network (VPN)~~ must be created adhering to the following security requirements:
- | **[For the purposes of ITBT please see Vol 1 Appendix 14 Network VPN Standards]**
- 6.3. The data link must be able to support up to 150 connected agents per day.
- | 6.4. The data link must have enough bandwidth to support at least 75 concurrent connected agents at a particular point in time. Please indicate the bandwidth you will make available, and the percentage of your overall bandwidth that this represents.
- 6.5. The data link network latency must not exceed a round trip delay of 50ms.
- 6.6. The third party supplier will need to create a DNS stub zone in order to resolve the Authority's addresses.
- 6.7. The solution needs to be monitored. Please provide details on how you plan to monitor both the data link & the telephony components, and detail any support function that is in place.
- 6.8. The telephony platform must be able to support up to 150 connected agents per day.
- 6.9. The telephony platform must have enough capacity to support at least 75 concurrent connected agents at a particular point in time.
- 6.10. Every Agent must have a unique Direct Dial Inwards (DDI) number.
- 6.11. Telephone calls are to be answered by the Service Provider's agent and not by the Service Provider's telephone system (e.g. voicemail).
- 6.12. The Service Provider must ensure there is no loss of voice data for the whole duration of a call between sites.
- 6.13. Connectivity to the Authority telephone system must be actively monitored.

5 SCHEDULE 5 – TRAINING

1. Introduction

1.1. Scope and Purpose

These alternative proposals shall not excuse the Service Provider from any liability other than on the same grounds and to the same extent *mutatis mutandis* as it would have been excused from liability for performing its obligations under this Contract (before the proposed Variation took effect). The alternative proposal(s) shall give details of the extent to which the Service Provider seeks to be excused from liability on other grounds or to a different extent in implementing the Variation and the corresponding change (if any) to the amount of the adjustment to the Charges which would otherwise be required in respect of implementing the Variation.
- 6.2. Unless the Authority requires otherwise, the Service Provider's proposal shall be a fixed price lump sum based on the allocation of risk specified in the Variation. However, the Service Provider may in addition include pricing for alternative options to be considered by the Authority.
- 6.3. The Authority may, from time to time, provide the Service Provider with information in relation to possible future Variations for the express purpose of providing the Service Provider with the means of taking such possible Variations into account in planning its operations and capital expenditure programmes and so as to reduce the costs of implementing such Variations in the future.

7. Value for Money

- 7.1. To enable the Authority to effectively determine whether VfM is being achieved in respect of any Variation, it will be necessary for the Service Provider to be transparent in the pricing of any proposed modification to the Charges arising from that Variation in accordance with this Schedule and its general accounting in so far as these are relevant to demonstrating VfM associated with that Variation.
- 7.2. Proposed modification to the Charges in accordance with a Variation shall be priced on a transparent and "open book" basis in accordance with paragraph 7.3 below.
- 7.3. Open Book Accounting
 - 7.3.1. The Service Provider shall calculate any modifications proposed to the Charges in accordance with this Schedule on a "bottom up" basis.

 - 7.3.2.1. a reasonable level of target profit (having regard to what the Service Provider has achieved and has been and is forecast to achieve under the Contract);
 - 7.3.2.2. overheads (with an explanation of the principles on which they have been appropriated to the Contract and to the Variation); and
 - 7.3.2.3. any additional risks being incurred or existing risks being reduced (as the case may be) having regard to the terms of paragraph 6.1.3.

TfL Supplier Diversity Definitions

Issue Date: February 2010

Effective: February 2010

1. **Document Outline**

1.1 **Background**

Encouraging a diverse base of supplier forms a part of the GLA Group Responsible Procurement Policy. The TfL Supplier Diversity Definitions ensure consistency across Supplier Diversity activities across TfL. These definitions form a basis for the TfL Supplier Diversity Policy and act as a basis for alignment in the measurement of diverse suppliers.

i) 0-49 Full Time Equivalent employees¹;

AND EITHER

⁵ Further explanation is outlined in Section 7.7 (Definition of Size) & 7.8 (Ownership Categorisation)

4. **Black, Asian and Minority Ethnic (BAME) owned businesses**

A Black, Asian and Minority Ethnic (BAME) owned business is a business which is 51% or more owned by members of one or more Black, Asian or Minority ethnic groups.

Minority ethnic groups are all people including those who have classified themselves as members of ethnic groups other than 'White British'.

The minority ethnic classification groups used by TfL for monitoring purposes are:

<u>Ethnic group</u>	<u>Racial origin</u>
White	Irish Any other White background
Mixed	White & Black Caribbean White & Black African White & Asian Any other Mixed background
Asian or Asian British	Indian Pakistani Bangladeshi Any other Asian background
Black or Black British	Caribbean African Any other Black background
Chinese or other Ethnic Group	Chinese Any other Ethnic Group

5. **Suppliers from other under-represented groups or protected groups**

5.1 A Supplier from an under-represented group is one which is 51% or more owned by members of one or more of the following groups (where not covered by previous definitions):

- 5.1.1 Women (gender)
- 5.1.2 Disabled people with physical and sensory impairments, learning difficulties and mental health requirements;

6. **Suppliers demonstrating a diverse workforce composition**

This relates to Full Time Equivalent employees in the supplier's workforce who may be from one or more minority ethnic groups, and/or under-represented groups and/or protected groups as listed in II and III above.

7. Other Definitions & Information

7.1 Full-Time Equivalent Employees

Where employee numbers are used, these refer to Full-Time Equivalents (FTEs) expressed in **Annual Work Units** (see below). Staff headcount should include full-time, part-time and seasonal staff and includes the following:

- Employees
- Persons working for the enterprise being subordinated to it and considered to be employees under national law
- Owner managers
- Partners engaged in regular activity in the enterprise and benefiting from financial advantages from the enterprise.

Full-time workers are expressed as hours worked per week. TfL refer to standard UK hours of work as full time workers – i.e. those who work 35 hours a week and 52 weeks a year (including annual leave).

7.2 Annual Work Units

Refer to anyone who worked, over the past year, full-time within your enterprise, or on its behalf, during the entire reference year counts as one unit. You treat part-time staff, seasonal workers and those who did not work the full year as fractions of one unit.

7.3 Turnover

Turnover is in line with that defined in the Companies Act 1985:

The amounts derived from the provision of goods and services falling within the company's ordinary activities, after deduction of:

- i) trade discounts
- ii) value added tax

Please refer to Section 7.8 regarding ownership categorisation to understand how to interpret ownership, where an enterprise is part of a parent organisation.

7.4 Financial Year

Financial Year relates to 1st April – 31st March or any other 12 month period as defined by the company.

All data must be relating to the last approved accounting period and calculated on an annual basis. In the case of newly-established enterprises whose accounts have not yet been approved, the data to apply shall be derived from a reliable estimate made in the course of the financial year.

7.5 Balance Sheet Total

The annual balance sheet total refers to the value of your company's main assets.

7.6 Ownership

Individual or those in named control holding capital or voting rights - either through private or shared ownership - of any given business entity.

7.7 Definition of Size

Where headcount and turnover and/or balance sheet conditions apply to different size definitions, headcount acts as the more predominant aspect, in defining size.

An organisation does not need to satisfy both turnover and balance sheet total, only one of the conditions and may exceed one of them without losing its status. This is illustrated by an organisation which has 30 employees, a turnover of £12 million and a balance sheet total of £10 million. The number of employees figure would class the organisation as a small organisation, however the turnover and balance sheet total define the organisation as medium. In this case, the headcount would be used to define the classification of the organisation. This organisation would be classed as a small organisation.

To illustrate this, the following scenarios have been mapped for the different characteristics of supplier diversity definitions (based on information from the Department for Trade & Industry (now Department for Business Enterprise & Regulatory Reform)):

		Turnover/Balance Sheet Total		
		£5.6m net(up to)/ £2.8m net (up to)	£22.8m net(up to/incl.)/ £11.4m net (up to/incl.)	£22.8m net(over)/ £11.4m net (over)
Employees	0-49	ü	Employees more predominant	Employees more predominant
	50-249	Employees more predominant	ü	Employees more predominant
	250+	Employees more predominant	Employees more predominant	ü

7.8 Ownership Categorisation

EU Commission Definition on Enterprise Ownership Categorisation

The European Commission's Guidance published in 2005 "The New SME Definition: User Guide and Model Declaration"⁶, outlines parameters for defining an organisation's ownership categorisation and whether an organisation is autonomous, partner or linked.

7.8.1 Autonomous

This is the most common category of ownership.

An organisation is autonomous if:

- It is totally independent, i.e. there is no participation in other enterprises and no enterprise has a participation.

- It has a holding of less than 25% of the capital or voting rights (whichever is the higher) in one or more other enterprises and/or outsiders do not have a stake of 25% or more of the capital or voting rights (whichever is the higher) in your enterprise.

If an organisation is autonomous, it means that it is not a partner or linked to another enterprise

7.8.2 Partner

An enterprise is a partner enterprise if:

- It has a holding equal to or greater than 25%, of the capital or voting rights in another enterprise and/or another enterprise has a holding equal to or greater than 25% in the other.

It is not linked to another enterprise. This means, among other things, that voting rights in the other enterprise (or vice versa) do not exceed 50%.

7.8.3 Linked

Enterprises formed as a **group** through the direct or indirect control of the majority of voting rights. An enterprise owned by another or through the ability to exercise a **dominant influence** on another enterprise.

Two or more enterprises are linked when they have any of the following relationships:

- One enterprise holds a majority of the shareholders' or members' voting rights in another.

- One enterprise is entitled to appoint or remove a majority of the administrative, management or supervisory body of another.

- A contract between the enterprises, or a provision in the memorandum or articles of association of one of the enterprises, enables one to exercise a dominant influence over the other.

- One enterprise is able, by agreement, to exercise sole control over a majority of shareholders' or members' voting rights in another.
