Subject: Speed Survey A10

[REDACTED]
Gents, In regards to the email below and following on from the CRW briefing that [REDACTED] TFL gave, [REDACTED] and I are keen to get a flavour of the sort of issues that the A10 is experiencing.

With the skills and the extra traffic knowledge that you have, over and above your STT colleagues, we wish you to plot up on the A10 at various spots at various times (not just rush hour periods) to establish what offences that are being committed. Such as speed, anti-social driving behaviour and junction offences (breaching ATS, No right turns etc). This will build up a better and an up to date picture of the sort of problems that truly exist. Please could you also determine whether a CRW approach may work along the A10 and if so, best locations for which are safe for them to operate in. Also could you look at whether certain areas are worth additional Traffic enforcement tasking/resources due to the problems occurring, being worthy of our deployment.

A basic tasking sheet has been attached to complete. Please can you also take out the Roadwatch leaflets with you and begin to hand them out as a way of enforcing the message.

Unfortunately, both [REDACTED] & I are away on holiday for the next week or so, but please submit your tasking returns to my email box.

GPS's

Please could the above TPCSO's be tasked with the above covering the A10 for the next two weeks commencing 14 Aug 2017. Alternate between them, with 2 Officers deployed at any one time. Carms has been updated. If there is a camera competency trained Officer to take a few photos as well; that would be excellent. Show off the good work that we are doing.

[REDACTED]
In terms of your tasking sheet, I have not included the postcode as it makes little difference where they originate from.

The two officers [REDACTED] and [REDACTED] are now on board but are finishing off the various training such as Fast roads and Speed detection. There is also a bit of Holiday due to the busy month of August. However, I am getting work returns from them regarding their work. I have a meeting scheduled with them for 30.07.2017.

When I get back, I will collate the figures and send you the raw data. I will also examine what we have got and establish where the issues actually lie, linking in with Airspace and whether we need additional tasking/resources. Hopefully both TFL camera vans will be available by then and we can deploy them more effectively with the data obtained.

I will catch up with you on my return.

Kind regards

[REDACTED]

Subject: Speed Survey A10

Hi [REDACTED]

Hope you are well. I have spoken to our comms manager in my department ([REDACTED] – copied in). She has spoken to our press office, who were very interested in promoting work on the A10. Firstly, it would be a good idea for us to get PCSOs to undertake a speed survey so we can have some headline figure – ‘x number of vehicles caught speeding on the A10 in just 4 hours’ along with a strongly worded message from an officer.

I have created the attached speed survey – I wonder if you would be able to commit some of your PCSOs to complete it for me? I think it would just require a few of them to attend the A10 with a speed gun for a morning or an afternoon, note down the number of vehicles caught speeding along with VRMs and vehicle type (if possible) and pass that info onto us. I have included beginning of postcode so we can determine whether they are local or not. If the PCSOs don't catch the VRM it would still be useful for them to note down the time, speed, and vehicle type. If they do get the VRM and someone is available to do a PNC check back at the base great, but not essential. I think the best location for this would be around the Turkey Street junction as I have been told this is where the speeding gets bad (obviously up to you though you know the location far better than me). It would also be great if we could get some photos of the PCSOs doing the speed surveys that we could include in any press release.

Let me know what you think! The press office have suggested we do this every three months (ish) to monitor the issue. Do you think there is any chance of this being done one day next week?

On another note, how has the first week gone having the two extra officers in Enfield?

Look forward to hearing from you!

Cheers

[REDACTED]
