Time period: 07/01/2024 to 03/08/2024.

Line: District.

Service Operated notes:

Service Operated % is defined as the percentage of trains that have passed through a measuring point compared with the scheduled timetable.

If there is no service scheduled on a section of the line on a particular day (for example due to engineering works), the date will not appear in the report.

Actual trains are measured from proxy locations

Netmis system can have issues with the data feed from the signalling system meaning that trains can be over or under counted on occasion.

Issues with the feed can also result in data being lost.

Figures should be used as a guide, and not taken as exact.

Schedule data is based on the data loaded into iCart system.

Days affected by data quality issues:

11/06/2024: intermittent data loss between 09-10 hours.

Measuring locations used:

Ealing Common (eastbound and westbound): measures the number of trains passing through the Acton Town to Ealing Broadway section of the line.

Gunnersbury (eastbound and westbound): measures the number of trains passing through the Richmond to Turnham Green section of the line.

Southfields (eastbound and westbound): measures the number of trains passing through the Wimbledon to Putney Bridge section of the line.

High St. Kensington (eastbound and westbound): measures the number of trains passing through the High St. Kensington to Edgware Road section of the line.

Hornchurch (eastbound and westbound): measures the number of trains passing through the Hornchurch to Dagenham East section of the line.
