

JOB DESCRIPTION

JOB TITLE : Service Controller (Level 1)

REPORTS TO Service Manager

DATE: April 2005

1. JOB PURPOSE

- 1.1 To Monitor, record and signal trains through designated areas, operating multi site signalling equipment including emergency back up systems, ensuring a safe and efficient operation of train services.
- 1.2 Providing prompt accurate train service information to managers, customers, staff, maintenance engineers and other lines.

2. PRINCIPAL ACCOUNTABILITIES

- 2.1 To collate and analyse real time service performance data, monitoring the effects of all incidents that disrupt the normal operation of the train service, ensuring safety is maintained. Minimise the impact of any disruption to customers and staff by making manual adjustments to the train service as necessary. Accurately record all incidents occurring on shift.
- 2.2 Constantly monitor service performance and loadings and advise the appropriate Service Controller and / or Fault Report Centre of any failure to signal control equipment, assisting the service controller / Duty Manager in planning service amendments.
- 2.3 Monitor Traction Current supplies as appropriate Informing Service Duty Controller and or the Fault report centre of any defects. Ensure authorisation to discharge Traction Current is passed to the DCRE at close of traffic to facilitate the commencement of engineering hours.
- 2.4 Act on information published in the E.W.S.A engineering notices, train circulars and special train notices for any short notice train movements.
- 2.5 Carry out best methods of implementation of train cancellations, diversions and reformations.
- 2.6 Monitoring the operation of the train service for optimum customer service purposes by: -
 - 2.6.1 Where necessary, recording all train movements through the area of control;

- 2.6.2 Advising the Service Controller (Level 2) of the development of service disruptions and act on the Service Controller's (Level 2) instructions, taking necessary action to provide the best train service possible;
 - 2.6.3 Operating back up facilities and working at remote locations during failures, providing advice and guidance to ensure successful repair and staff/customer safety;
 - 2.6.4 Testing signals and checking emergency equipment regularly and reporting any defects, recommending appropriate courses of action
- 2.7 Provide a comprehensive communication flow by: -
- 2.7.1 Operating communication equipment as necessary;
 - 2.7.2 Advising train staff and managers about changes in service requirements;
 - 2.7.3 Providing real time train service information direct to customers or to staff for transmission to customers.
 - 2.7.4 Maintain a written log book in a legal format for use by the company and other bodies.
 - 2.7.5 Ensuring a detailed handover to the next Service Controller on shift by recording accurate information on changes to trains, timetables, train or equipment failures, incidents and station status.
- 2.8 During failures or at the request of the Service Controller (Level 2), organise protection and facilitate repair and return of services.
- 2.9 Producing statistics, computer information, written reports as necessary, for senior Management as requested.
- 2.10 Assist in the training and coaching of any service control staff and others that require training/familiarisation within the service control area.
- 2.11 Able to assume the role of Service Controller (Level 2) or Service Operator as necessary in their absence or on an emergency cover basis.
- 2.12 Operate new equipment and embrace the functionality that it brings.

3. NATURE OF WORK

- 3.1 This role requires the active monitoring of the train service through specified areas; making use of signal operating equipment in order to maintain and regulate the train service. This role requires a significant amount of record keeping and the inputting of service data and submission of reports on failures and delays. It is also a liaison role that requires communication with a range of personnel involved in the operation and maintenance of the railway.

4. JOB BOUNDARIES & DECISION MAKING

- 4.1 The Working Reference Manual governs most areas of operational decision making.
- 4.2 Service Operators can vary routing and platform working in the best interests of customer service.

- 4.3 Health and Safety regulations and requirements, Framework of agreements and all other Company Policies and Codes are key elements that define this role.
