SUMMARY OF KNOWN/SUSPECTED HAZARDOUS MATERIALS

The purpose of this summary report is to detail the presence of any known (K) Asbestos Containing Materials (ACMs) within the Asset. Any areas inaccessible during the Type 2 survey are presumed (P) or strongly presumed (SP) to contain ACMs until known otherwise. All inaccessible areas will need to be surveyed prior to work being undertaken in these areas. Prior to any intrusive works commencing a TLF-187 must be submitted to the HMU.

The information on this Summary sheet does not include any information on contaminated ballast, as this information is only valid for a certain time after sampling is complete; Anyone who needs to remove any ballast or shingle beds should submit a TLF187 directly to the Tube Lines Hazardous Materials Unit detailing their works and requirements;

All contractors working on Tube Lines property must remain vigilant during their works and if any suspect material is encountered which is likely to be disturbed, the Hazardous Materials Unit (HMU) must be contacted before continuing.

For further guidance contact the HMU - Email: asbestos@tubelines.com

All Surveys undertaken in the direction of travel

Colour Key to Summary Sheet

- Asbestos/Lead paint was present in room/location but was removed.
- Historically asbestos has been used in unusual application throughout LUL (Tube Lines) network. Therefore, all contractors must remain vigilant during the course of their work and if any suspect materials are encountered, the Asbestos Management Unit must be contacted before continuing.
- Asbestos is Presumed (P) Strongly Presumed (SP) or Known (K) to be present in location
- Lead paint is present in room/location

SUMMARY OF KNOWN/SUSPECTED HAZARDOUS MATERIALS

The purpose of this summary report is to detail the presence of any known (K) Asbestos Containing Materials (ACMs) within the Asset. Any areas inaccessible during the Type 2 survey are presumed (P) or strongly presumed (SP) to contain ACMs until known otherwise. All inaccessible areas will need to be surveyed prior to work being undertaken in these areas. Prior to any intrusive works commencing a TLF-187 must be submitted to the HMU.

The information on this Summary sheet does not include any information on contaminated ballast, as this information is only valid for a certain time after sampling is complete; Anyone who needs to remove any ballast or shingle beds should submit a TLF187 directly to the Tube Lines Hazardous Materials Unit detailing their works and requirements;

All contractors working on Tube Lines property must remain vigilant during their works and if any suspect material is encountered which is likely to be disturbed, the Hazardous Materials Unit (HMU) must be contacted before continuing.

For further guidance contact the HMU - Email: asbestos@tubelines.com

N072/NNBFA - East Finchley - Finchley Central Northbound - R190433
All Surveys undertaken in the direction of travel

Colour Key to Summary Sheet

	Asbestos/Lead paint was present in room/location but was removed.
	Historically asbestos has been used in unusual application throughout LUL (Tube Lines) network. Therefore, all contractors must remain vigilant during the course of their work and if any suspect materials are encountered, the Asbestos Management Unit must be contacted before continuing.
	Asbestos is Presumed (P) Strongly Presumed (SP) or Known (K) to be present in location
	Lead paint is present in room/location
