Outcome: Non Compliant
Notes: inspection carried out as a result of revoked drivers showing up on the operator driver/vehicle web upload. [REDACTED] has confirmed all drivers have worked since since July this year. He confirmed Uber run licence checker every day and all drivers checked once every 30 days. [REDACTED] has provided /wrote on driver file the last date worked and the date they last used licence checker. Evidence produced that licence checker used and 3 of the drivers were already stopped from working. 2 drivers have self employment prohibited conditions - [REDACTED] said has now stopped those divers working and will put a flag on system to prevent this happening again. 4 drivers stopped from working as a result of this inspection - [REDACTED] showed evidence of this on their system.

Scoring

Score: **100** Category: **7**

Following further investigation into the issues identified with the Cat 7 outcome (the record of which can be found on Appx 8), we were satisfied that the operator took all reasonable steps to mitigate and respond to the issues and the investigation concluded that the non compliance identified was outside of the operators control. No further action was recommended as a result of this.
