

Cycleway Signage Assessment

Route name	Quietway 6 - Cycleway 16 - section from Manor Park to Barkingside		
Sponsor	Caspar Jack		
Review carried out by	Kate Balderson	Date	12/11/2019

Route map

Length of route	6km	
------------------------	-----	--

Background info

<i>E.g., where does it go from / to, does it link to any other routes, when was it built, is it well used, have we had any feedback about the route (negative / positive)</i>	Launched in autumn 2018 as Q16 this is part of a longer route which will run through Wanstead Park to near Stratford. Some of this route (west of Manor Park) has been constructed but not all, and it hasn't been signed. There has been some criticism about the quality of Q6 on Twitter but this seems to focus on the western end of the route around the Stratford area.

Performance against the Quality Criteria

<i>Summary of how the route performs against the Quality Criteria</i>	The route runs on a mixture of shared use pedestrian / cycle track (either on footways or through parks) and quiet streets. Toucan crossings are provided where busier roads have to be crossed. Only one very short section of the route does not meet the quality criteria, a 50m section where it uses The Drive to pass between Exeter Gardens and Cowley Road. With flows of around 620 vehicles during the AM peak and an 85th%ile speed of 32mph, this short stretch does not meet the Quality Criteria and should be reviewed. However, overall this is a good quality route which should be incorporated into the cycle network.
---	---

Sponsors Cycleway signing recommendation	This route should signed as part of the Cycleways network

Improvements which could be considered

<i>Note here any sections of the route where schemes to deliver improvements in quality are already being planned, or could be considered in future. These will be collated and assessed elsewhere - these are ideas only, there is no commitment to add them to the programme.</i>	Review the short 50m link along The Drive between Exeter Gardens and Cowley Road to ensure this section meets the quality criteria
