---

Hi James,

I have spoken to my colleagues in Surface Transport. A scheme at this location is still at the very early pre-feasibility stage and it is currently not in our programme. A corridor study identified there was an issue here and some outcome definition work was done to identify possible options to take forward should funding ever become available. Securing this funding will then give us scope to obtain funding from the programme to progress it.

In terms of the improvements being proposed, this is to introduce an at-grade push button controlled crossing on the eastern arm of the roundabout, to provide pedestrians and cyclists with an accessible alternative to the existing footbridge. This would have the additional benefit of providing better control over the traffic using the roundabout. This project would also deliver benefits to bus times from changes to the lane marking on the westbound carriageway and the widening of the internal gyratory at the roundabout.

I hope this answers your questions.

Let me know if I can be of any more assistance.

Thanks,

George

Hi James,

Sorry I'm out of office at the minute and tomorrow morning. I don't have the info off the top of my head but I think it was a new crossing at the roundabout.

I'll do some digging on emails/ talk to the sponsor tomorrow and get back to you.

Sorry,

George

Hi George,

Could you please provide some further details of the A316 pedestrian/cycle safety scheme for committee please? This is getting raised by councillors so if we could have this asap but before Wednesday's committee that would be much appreciated:

- What improvements are being done?
- When are they being done?
- Any further relevant details

Thanks,

James

Hi James,

I have just doubled checked with my colleague in buses and unfortunately they haven't received the consultation report as of yet, so are unable to make any final decisions at this stage. But they said they will update accordingly.

Thanks,

George

Hi George,

Are the proposed route changes to routes 10, 419 and H22 definitely going ahead?

Regards,

James

Hi James,

Yes, that is great.

Thanks,  
George

Thanks George,

We have requested a contribution towards a CPZ review/implementation and a restriction for staff from accessing permits.

Would I be right in saying TfL support this position?

Regards,  
James

Hi James,

Thanks for this. In terms of the CPZ we would recommend that if parking becomes an issue, that the council should consider extending the recently consulted on CPZ in the area in order to help mode shift.

I am surprised that residents close by to the school did not support the CPZ? Also I presume Hospital Bridge Rd will have double yellows down it given how narrow the road is and it being a bus route?

Thanks again,  
George

Hi George,

Please see attached draft CUA. It is basically for use of the playing pitches, MUGA and indoor sports hall during the weekday evenings (until 8.30pm) and on Sat (09:00-13:00), including during school hols.

The CPZ is set to be implemented late 2019. Further details of the CPZ changes can be seen below. It would not cover the site/HBR but would cover some surrounding roads.

Hi,

Thanks for this, I will double check with my colleague. Before I do, is there any update on the CPZ?

Also is there any info on the type of community use? Or I vaguely remember there was examples in the TA for during the week, will it just be the same??

Thanks,  
George

Hi George,

To confirm on a few points:

- We can confirm that the 20mph speed limit for the borough is being rolled out later this summer with Whitton expected to be Winter/Spring 2020.
- The applicant is proposing community use on Saturdays (including in school holidays) – 09:00-13:00.

Please let me know if you have any further comments as soon as possible as the report is to be finalised for committee tomorrow. We can always update through the committee addendum nearer the time if needs be.

Regards,  
James

**Subject:** 18/3561/FUL, Turing House School Response

Hi James,

Sorry for the slow reply. I have consulted internally and we still have a number of outstanding comments that need addressing.

#### Car Parking

The applicant is proposing 45 car park spaces, at a ratio of 0.5 spaces for the proposed number of staff. This level of car parking is considered to undermine the Mayor's target for 75% trips being carried out by walking, cycling or public transport by 2041 (as set out in the Mayor's Transport Strategy and draft London Plan policy T1). At the same time it also undermines the draft Richmond Local Implementation Plan (LIP). The Richmond LIP states a target of 75% walking, cycling and public transport usage, and it should be adjusted accordingly to reflect these targets. Previously TfL have requested a reduction of car parking spaces to 23 car parking spaces. This is a sufficient level of car parking that would allow the school to operate.

It is important to note that since the proposals are for a new school in this location, travel patterns to/from the site are yet to be established. Therefore, over time as the school develops to reach full capacity, having few car parking spaces would influence the staff travel patterns from the outset.

#### Controlled Parking Zone (CPZ)

It is understood that the London Borough of Richmond upon Thames has recently consulted on a CPZ in the area surrounding the proposed site. This is supported by TfL, in line with draft London Plan Policy T6, and would help to achieve modal shift and encourage the use of walking, cycling and public transport. The London Borough of Richmond could request a financial contribution towards the implementation of this scheme.

#### Buses

TfL have been in talks with the applicant and the London Borough of Richmond regarding the financial bus contributions and are waiting to hear a response from the applicant.

#### Cycle Parking

It has been noted and welcomed that the applicant has confirmed all cycle parking is London Cycle Design Standard compliant.

#### Pedestrian and Cyclist Safety

The financial contribution of £120k towards improvements to the Hospital Bridge Road/ A316 Roundabout is welcomed and should be secured via the S106 agreement.

TfL request further information on the Borough wide proposal of 20mph, it is understood that this has been to consultation. If this consultation was not successful then TfL would expect the London Borough of Richmond upon Thames to implement a 20mph zone in this stretch of Hospital Bridge Road, in order to adhere to the Vision Zero Strategy.

The proposal includes Turing House School and the neighbouring Nursery sharing the access from Hospital Bridge Road. It is noted that the access will be improved, however TfL request clarification if the applicant has spoken with the adjoining site to request that deliveries will occur outside school arrival and finishing times. An agreement such as this would reduce the potential risk of conflict between the pedestrian, cyclists and vehicles, adhering to the Vision Zero strategy.

#### Community Use

TfL request confirmation on whether the applicant is proposing community use for the school on weekends. This should be explored to see if there are any potential impact on the surrounding area.

Please do not hesitate to contact me if you have any further queries.

Kind regards,

George
